

Pelloby overhead cranes - any size, any capacity

Pelloby have been manufacturing overhead travelling cranes for nearly 50 years. Providing products that are reliable, built to last and individually designed for each application, we supply both end users and trade resellers around the world.

All our overhead crane components are produced at our Telford based factory to the highest of UK manufacturing standards. This includes the supporting gantry steelwork, the end carriages, the beams and everything else required for a top quality lifting system for your workplace.

Every single Pelloby overhead crane is made to order with designs that can be fully customised around the lifting application in hand:

- >> **Single girder overhead cranes**
- >> **Double girder overhead cranes**
- >> **Triple girder overhead cranes**
- >> **Process cranes**
- >> **Underslung overhead cranes**
- >> **Top running overhead cranes**
- >> **Automated overhead cranes**
- >> **Special overhead cranes**

From an initial site visit at your premises through to manufacturing, delivery and installation, Pelloby are committed to helping every customer find the ideal lifting solution to meet their needs.

Call us on **01952 586 626** or email sales@pelloby.com to find out more.

Quick quotations, bespoke designs

When it comes to finding an overhead crane that meets your requirements, our team are on hand to provide all the information you need.

- >> **Site visits** – We can send an expert to your premises for a free site visit prior to quoting, to take measurements and fully scope out your requirements.
- >> **Detailed quotations** – We can provide comprehensive plans and drawings for any overhead crane enquiry within a fast timeframe.
- >> **Computerised designs** – The latest technology lets us find cost-effective and space efficient ways of meeting your workplace's lifting goals.

Quality UK manufacturing

Every single overhead crane we produce is made to order, guaranteeing you receive a solution custom built around your requirements.

- >> **Optional extras** – You can customise every aspect of your crane down to a paint finish that matches your corporate colours. We also offer hoists and galvanised protection for outdoor applications, safety features such as parking locks, as well as pendants for remote operation, walkways for easy access and floodlights.
- >> **Pelloby Kinematic Drive System** – All of our overhead cranes benefit from this advanced inverter technology which offers variable speed control on the crab as it travels along the beam for a superior operating performance.

Installation and follow up support

From placing your initial order through to final commissioning, we make the process of acquiring a new crane as simple as possible.

- >> **Project management** – Our team of expert engineers can take care of the installation of the overhead crane at your premises and carry out final testing to guarantee the system is ready for use.
- >> **Operator training** – We provide comprehensive training courses to teach your staff how to operate the crane safely.
- >> **Thorough examinations** – Pelloby offer ongoing support including maintenance contracts and LEAA recommended annual safety inspections to guarantee the upkeep of your lifting equipment.

>> OVERHEAD CRANES >> PORTAL CRANES >> JIB CRANES >> AUTOMATED HANDLING SYSTEMS >> HOISTS >> LIFTING EQUIPMENT >> SERVICE & SPARES

Pelloby design and manufacture lifting solutions for any application.
